

One Thing About Jeff's Hat; You Can Sink It Any Way.

BY "BUD" FISHER

The Markets

TODAY'S MARKET IS SLOW AND HEAVY

(By Leased Wire to Evening Herald.)

New York, June 11.—The market closed heavy. Reactionary tendencies were displayed today because of the reluctance of traders to buy pending the freight rate decision and the unusual growth of the gold export movement. Efforts to market small amounts of stocks caused greater weakness in the final hour. Canadian Pacific fell 1 1/2 and Reading and Smelting one point.

Closing prices on the more important stocks were:

Amalgamated, 73 3/4.

Sugar, 17 3/4.

Atchison, 99 1/8.

Reading, 18 1/2.

Southern Pacific, 94 1/8.

Union Pacific, 155 7/8.

Steel, preferred, 189 3/8.

Steel, preferred, 189 3/8.

Chicago Grain

Chicago, June 11.—Heavy selling today carried the wheat market to a new low level for the season, the third time this week. The opening which was a shade to 1 1/2 to 1 1/4 lower, was followed by a material further setback. Closing prices were heavy, 3 1/2 to 7 3/4 to 10 1/2 lower.

Corn started easier with wheat, but soon rallied. Prices opened 1 1/2 to 2 1/2 up. The subsequent hardening was most noticeable in the nearby options. Closing prices were steady, 3 1/2 to 5 1/2 up.

Oats were governed mainly by corn.

Higher quotations on the yards gave

provisions a lift. Business, however,

was only moderate.

Wheat—July, 84 2/8; Sept., 82 7/8.

Corn—July, 70 7/8; Sept., 68 1/4.

Oats—July, 40c; Sept., 38 5/8.

Pork—July, \$20.75; Sept., \$26.12.

Lard—July, \$10.12; Sept., \$10.12.

Ribs—July, \$11.42; Sept., \$11.42.

OPERATIONS IN THE LIVE STOCK MARKET

spot and August, \$12.45@13.99.

Tin firm; spot, \$31.00@21.25; Aug-
ust, \$31.15@21.50.

Iron quiet, unchanged.

London—Copper quiet; spot, 61 17/2

6d; futures, 62 16/2.

Tin quiet; spot, 143; futures, 142 1/2.

Iron—Cleveland warrants, 518 3d.

COTTON TELLS HOW TO
CONTROL FLEA-BEETLES

State College, N. M., June 11.—

Flea beetles are true beetles but are
given this common name because of
their habit of jumping like fleas
when disturbed.There are several
diferent species of different descrip-
tions—metallic blue or green, black
with yellow stripes, etc.—but all are
fairly small. They attack many
kinds of vegetation in the garden,
such as cabbage, turnips, spinach,
etc., and one kind is especially fond
of grapes. If conditions are favor-
able they come out suddenly and in
great numbers so it is well to be pre-
pared for them when they do come.
Such has been the case in the last
few days in many localities with the
species that attacks the grapes—the
small, metallic, blue-green one.
It is also of great help in an emer-
gency to destroy some of the insects
by brushing them off the plants with a
twig brush or something similar.
With unripe fruit, however, the beetles
will eat the pulp and damage the fruit.
These beetles will desert sprayed
foliage for unsprayed more often
than not. So it is well to leave a
few plants of their choice food un-
sprayed so they will collect on those
in immense numbers where they may
then be killed by being quickly and
thoroughly sprayed with pure kero-
sene. This will sacrifice the plants
but get the insects.
